## INTRODUCTION

The agricultural and food products import series for Alberta was initiated in 1987. The first two reports, covering 1985 and 1986, presented import values by country of origin. For 1987, a special report based on the results of a comprehensive study of international and interprovincial imports was published under the title A Review of Alberta's Agricultural and Food Products Imports During 1987.

The reports for 1988 and 1989 presented information on import quantities and values by country as well as by commodity. The present report covers calendar year 1990 in the same format.

## SOURCES AND METHODS

Data presented in this report, by definition, refer to goods which were brought into Canada in 1990, whether for immediate consumption or for storage in bonded customs warehouses.

Primary statistics were obtained from the International Trade Division of Statistics Canada. In a number of cases, adjustments and revisions were made to the primary data to arrive at the figures reported in this publication.

Import statistics are gathered by Revenue Canada at entry points and are reported by Statistics Canada on a province of clearance basis, indicating the province in which goods are cleared by Customs. This does not,however, always coincide with the province of final destination or consumption. Therefore, adjustments are necessary to overcome the challenge of interpretation associated with the interprovincial shipments of imported goods once within Canada's borders.

Information utilized to adjust the Statistics Canada data for Alberta and Western Canada was assembled from diverse sources within Alberta Agriculture as well as other government departments and industry. Sometimes the information required for adjustment was gathered or derived from secondary sources, mainly government publications. **It is relevant to note, however, that this adjustment process does not fully account for value-added activity in respect of further-processed goods that are shipped interprovincially.**

Valuation of imported goods is based on the General Agreement on Tariffs and Trade code system which generally requires that the value for duty be equivalent to the transaction value or the price actually paid or payable. Import values reported herein therefore exclude the freight and insurance costs in bringing the goods to Canada from the point of direct shipment, and are attributed to the countries in which the goods were produced, grown manufactured or extracted.

## IMPORT OVERVIEW

The value of Alberta's 1990 imports of primary and processed agricultural and food products from all non-Canadian sources was estimated at about $660 million. This compares with $634 million in 1989 and $602 million in 1988. The largest commodity categories, in terms of import value, consisted of those products that are not easily produced or raised in this province.

Fruits, vegetables and their preparations, at $251.8 million, accounted for 38.2 per cent of the import total and constituted the largest commodity category. Imports of animals and meats totalled $62.2 million while whiskey, wine, beer and other alcoholic and non-alcoholic beverage imports amounted to $61.1 million, making up 9.4 and 9.2 per cent, respectively, of the import total.

Imports of fish and other aquatic animals totalled $43.4 million. Cereals and cereal product imports amounted to $43.6 million, with other foods and food materials totalling $94.3 million. Coffee, tea, spices and soup preparations were major items in this category.

Overall, Alberta accounted for an estimated 7.6 per cent of the Canadian agricultural and food product import total of $8,652 million.

## TRADING PARTNER REVIEW

In 1990 the major sources of supply of agricultural and food commodities for Alberta, and Canada generally, included the United States and to a lesser extent Australia, the United Kingdom, France, Germany, Italy, the Peoples' Republic of China, Mexico Cuba and Brazil. These countries accounted for about $529 million worth of shipments to Alberta, over 80 per cent of the import total for the year.

### United States

The United States was the largest source of agricultural and food commodities imported into Alberta during 1990, as always. That country accounted for $386.1 million, or about 59 per cent, of the total imports for the year. The major items included fruits, vegetables and their products at $170.3 million (44.2 per cent),cereals and cereal products at $30.3 million (7.8 per cent),fish and aquatic animals at $28.5 million (7.4 per cent), and alcoholic and non-alcoholic beverages at $17.0 million (4.4 per cent). Miscellaneous foods and food material

imports, including ground coffee and coffee beans, spices, chocolates and other cocoa products, tomato ketchup and other sauces, and protein concentrates amounted to $38.0 million in total.

**Australia**

Estimated shipments of agricultural and food products into Alberta from Australia amounted to about $25.8 million dollars, up 37 per cent from the previous year's estimate of $18.8 million. Raw cane sugar constituted 64 per cent of total imports.

**United Kingdom**

Agricultural and food product imports into Alberta from the United Kingdom totalled $18.8 million in 1990, up slightly from $18.6 million a year earlier. Beverages (mainly whiskey), sugar and confectionery items, specialty food items like tea and chocolate, and cereal preparations such as sweet biscuits, waffles and wafers constituted about 92.0 per cent of the import total, at a value of $17.3 million.

**France**

Imports from France in 1990 were valued at almost $19.0 million or 2.9 per cent of the total Alberta imports of agricultural and food commodities. By comparison, 1989 importrts totalled $18.6 million and also constituted 2.9 of the province's imports for that year. Wine, cheese, sugar products and cocoa products made up the bulk of imports.

**Germany**

Alberta's imports of agricultural and food products from Germany in 1990 was estimated at $11.8 million, down from $12.1 million in 1989 and $13.2 million in 1988. Grape wines and cocoa products constituted a significant proportion of the imports.

**Italy**

Italian shipments of agricultural and food products to Alberta during 1990 were estimated at $11.3 million, up 6.6 per cent from a year earlier. Wine, cereal preparations, cocoa products and cheese accounted for most of this amount.

**China (Peoples' Republic)**

Approximately $11.7 million or 1.8 per cent of Alberta's agricultural and food imports in 1990 originated in the Peoples' Republic of China. This was markedly higher than 1989 when imports reached $8.4 million Some of the major commodities imported included shrimps and prawns, and preserved mushrooms.

**Mexico**

Mexico accounted for 3.6 per cent of Alberta's 1990 agricultural and food products imports, at an estimated $23.9 million. The main import items included tomatoes, peppers, bananas and melons.

**Cuba**

Imports of agri-food from Cuba in 1990 amounted to $10.8, up significantly from normal levels of $4 to $5 million. The main reason for this increase was a surge in raw cane sugar imports to more than twice the usual annual tonnage.

**Brazil**

Brazil supplied $10.0 million worth (1.5 per cent) of Alberta's agricultural and food product imports in 1990, down from $20.9 million in 1989 and $22.2 in 1988. Import items consisted almost entirely of coffee and cocoa beans and products, and orange juice.

**Others**

In addition to those countries identified in the foregoing, numerous others, generally controlling small but stable niches in the Alberta and Canadian markets, supplied a wide array of commodities to this province in 1990. Principal among them were the Netherlands ($8.7 million), Chile ($8.3 million), Thailand ($8.1 million), and Colombia ($7.3 million).
